THEME –“TOWARDS CARBON NEUTRALITY IN CONSTRUCTION: STRATEGIES AND SOLUTIONS”

1. Integrating Vernacular Architecture and Modern Urban Planning for Carbon neutral Built Environments- **Dr. Komagal Anupama K**
2. Remote Sensing for Carbon-Neutral Construction: Advancing Sustainability in the Built Environment- **Dr. Ekta Baranwal**
3. Reducing Carbon Footprints in Construction: The Impact of BIM and Digital Twins- **Ar. Sher Singh Baghel**
4. A Literature Review on Emerging Energy Solutions for Decarbonizing Buildings- **Baishali Pradhan, Dr. Bandana Jha**
5. Low Carbon Emission In Public Buildings Through Passive Architecture- **V Manish Prasad**
6. Need for the comprehensive sustainable building byelaw regulations to promote carbon neutrality in Indian cities- **Dr. Shilpa Madangopal, Dr. Rama R. Subrahmanian**
7. Sustainable and Accessible Homes: Evaluating Design Standards for Senior Citizen Housing- **Ar. Sudha J Gopinath, Dr. M N Chandrashekar, Dr. Asmita Yadav**
8. The Scope of Carbon Credit Trading Policies for India's burgeoning construction sector in par with international market- **Ar. Deepti Gupta, Dr. M N Chandrashekar**
9. Harnessing biogenic carbon in construction: A pathway to Sustainable Decarbonization- **Ar. Anusha TC**
10. Contribution of old buildings in reducing Carbon emission- **Ar. Shruti Pant, Dr. R. Jagannathan**
11. Comparative Analysis of Net Cost of Relatively Sustainable and Non-Sustainable Construction Materials- **Ar. Arobindo Gupta, Gowthami U Kumar**
